Dear Sirs or madam I have always belived that if you pay for a service you should get a better service. Since I have bought my XM I have used it for work and while on vacation. I'm a truck driver by trade and use the instant weather/traffic repots to plan the best routs around major cities. When I get dispatched on a load I check the major cities for the weather forecast. and at appox. 150 miles I start to check the traffic to plan the route that will cause the least amount of congetion. With the price of fuel hitting 2.00 a gal the least amount of sitting cuts into the bottom line. On normal AM/FM I normaly end up in a traffic jams,sit for a good amount of time wasting fuel and hours that I can run on a 14hr day. I think that since I pay for this sevice that the AM/FM stations should not have a problem with this type of service that in the long run keep the roads safer. I do not support the AM/FM broadcaster in any restrition of my right to pay for a better service than what they can give at thuis time .

Thank You Derek Frank
